McGAN'S
Ooty School of Architecture

(Recognized by The Council of Architecture, New Delhi & Affiliated to Anna University)

Writers, poets and other creative minds like architects have always known to pick up eclectic location around the world to pursue their work. This they say is because they need a quiet and serene environment to stimulate their creative energy.

According to behaviour scientist and top professors at Architecture Universities such as Academy of Neuroscience in San-Diego the design of spaces can help promote creativity, keep one focused and alert. That's why we selected OOTY as our location to built an Institution for Architecture.

Ooty is the capital of Nilgiri district in TamilNadu, South India on the Western Ghats has all the infra structure a district head quarters should have and the district collector under whom all the Govt departments functions including top police officials and other revenue departments which are essential for an Architectural Institution to function.

It is so strategically located at an altitude of 8500 ft. With controlled climate throughout the year plus easily accessible from two other states Kerala and Karnataka by Ghat roads. Two roads from Mettupalayam the foothills of Ooty one via Kothagiri and another via connoor 40kms each. The heritage mountain rail which celebrated 150 yrs recently, by which you can reach Connoor and by road 15km reach Perar where the college is located.

Why Ooty

The Graduate Programme in the school is designed for a sound practical training and advance teaching in Historic Preservation, Community Design and Visualization with the help of excellent computational, library and workshop facilities. Studying at the Ooty School of Architecture is an excellent way to complete a professional education at the graduate level.

Permission to join the college and study as a day scholar under exceptional circumstances if desired by parents is also available, but not recommended. For such students, bus facility is also available on payment of necessary charges.

RULES:

TURNOUT : Students must come to the classes dressed in neat and clean attire. Boys are to be clean shaven.

RAGGING: In conformity with the law that has strictly banned ragging in any form, the college will enforce this rigorously. Even without any complaint, the management will take cognizance of any student indulging in this despicable practice. Such students will be summarily removed from the rolls and criminal action will be taken against them. Students are advised to take this warning very seriously.

DECORUM: The College has set standards of behaviours both in and outside the campus. It is the duty of every student to carry himself or herself with dignity reflecting the high standards of behavioural and spiritual excellence aimed at by our Institution.

UNAUTHORISED ACTIVITIES : Any activity in the college premises as well as anywhere else that involves the assembly of students of this institution and any activity involving collection of any money must be undertaken only with prior written permission of the management. Organizing or participating in unauthorized activity will attract disciplinary action.

UNAUTHORISED MEMBERSHIP: Membership of any association or organization unconnected with the college must be undertaken only with the written permission of the management.

UNBECOMING BEHAVIOUR: Taking part in any anti-social, subversive, illegal or immoral activity will entail summary dismissal from the college. Whenever any student faces expulsion on any disciplinary ground, he or she forfeits the right to claim refund of any deposit or fees.

UNDESIRABLE PRACTICES : Use of alcohol, tobacco or any narcotic substance in any form whatsoever is strictly forbidden within the premises. Students are also strongly advised to desist from such habits at all times.

The Aim of the courses is to train Architects to provide expertise in Environmental Architecture and enable them to Design, plan, Construct, Evaluate and Advice on the creation of low energy, Eco Friendly Sustainable Buildings and also to sensitize the current and future environmental issues. The programme is also aimed to promote an interdisciplinary and strategic approach to design, that will enable the students to integrate their skills and co-operate in achieving genuinely excellent environmental performance in buildings.

The Post Graduate Programme in Architecture is a 2 year (4 semester-Regular) and 3 year (6 semester Flexible Mode) programme leading to the Degree of Masters of Architecture awarded by the Anna University, Chennai.

Eligibility:

Bachelor of Architecture or Civil Engineering or equivalent courses recognized by Council of Architecture. The Civil Engineering graduates are not eligible for registration as "Architects" on the basis on this M.Arch Degree as per the Architects Act 1972.

Parent:
 McGans Coty School of Architecture- I came to know about this school of Architecture through Mr. Solomon D. Vedamuthu, a renowned Architect, Educationist and trainer par excellence, in Chennai. Later, I get to know about the Angalamman Trust chaired by Mr. Murali Kumaran, who took so much interest in education in Architecture, for which he would have taken pains in his commercial it is very astonishing that the trust is not collecting any capitation fee and trying to provide all the amenities which are essential to the school of architecture. The few year of existence made them to build a new campus in Perar, a ten Km away from hustle and bustle of Coty Town, as earlier batches were staying in Coty itself. This year all the students have been accommodated in the newly built Hostel in a scenic valley. The spurt of demand and good number of admissions is a good augury for future; nevertheless, it brought pressure on available assets. As years go by I hope that the amenities would be put in place and going to become one of the sought after Residential Institution in Tamilnadu.

What is a striking feature is the dedication of Trust members, directors and faculties. Angalamman Educational Trust with Mr. Murali Kumaran as its Chairman visualised and gave shape to such a magnificent Service. The vision and aim of the Trust can be achieved only by the involvement and selfless participation of the stakeholders. The involvement of Director, Principal, HOD and others assures the same. The Institution created exclusively for Architecture likely to grow as a Gurukulam with free flow of ideas, creativity and utmost understanding among experienced Professors, teachers, senior students and the fresher's. The parents are willing to be part of the evolution the Administration is aimed at to bring in excellence in architectural academics. I as one among the parents of the benefactors wish McGans to grow like a wisdom tree.

McGan is investing heavily in its infrastructure-a state – of- art academic block and a new library to augment the original infrastructure. This will provide an atmosphere, ambience and energy to support a rigorous and dynamic academic curriculum and also will support more engaging pedagogy such as case discussions, workshops etc.

More than knowledge packed library, sophisticated hostel and well equipped computer lab infrastructure keeps enlarging and upkeeps to its fulfillment time to time . Yes! Our college is fully equipped with fantastic infrastructure to cater the student and inmates to feel more homely at the same trime in a very nominal affordably.

In addition following are the in-house facilities extended to everyone at stay.

- POWER LAUNDRY
- U.V. & R.O. PURIFIED DRINKING WATER
- MEDICAL ASSISTANCE
- TRANSPORT FACILITIES
- STATIONERY STORES
- WI-FI INTERNET
- CAFETERIA

Infrastructure

Library

The library is the best one in the significant investments among the colleagues importing Architecture Education.

Hostel

Mcgan's Ooty School of Architecture is a Residential Institution. Provision is made to accommodate all the students admitted in the Institution in our hostels. **Separate hostels for boys and girls.** The rooms of the Hostel are designed to influence the mind of the students for better study.
